¹Tech Satan

Satan has been so happy nowadays that he laughs out loud not knowing how to close his mouth.

The end of the world is coming, as clear and easy as counting the fingers.

The first idea of atomic bombs was bypassed due to expenses;
Using the poisonous gases would stink the heaven above the earth.

After the birth of the computer, the indication became clear.

Now with everyone has one in hand, busy fingering dumbing all other senses.

No more hello-saying, only wooden cocks abound.

No more thinking, no more pondering, no more talking, destruction by Satan is therefore guaranteed.
